Keep Improving to produce fine quality elevators

Sakura Elevator is a professional manufacturer of high quality elevators. To produce high quality elevators, we abide by the philosophies of, "*Technical Leadership, Excellent Quality, and Service First*". We have expanded our factory gradually to ensure sufficient production capacity. The scale of our new factory is comparable and even exceeds that of major international manufacturers.

Our product line encompasses various typed of elevators, including *Home elevators, Passenger elevators, Observation elevators, Hospital elevators, Car elevators, Parking facilities and more*. All of our products are the culmination of craftsmanship, technology, and aesthetics. The four major departments in our company, the R&D design, Manufacturing, Marketing and Sales, and Accounting departments, all work together to transform enclosed spaces into the safest, most comfortable

vertical transportation products for our clients.

Hence, to uphold international quality as our Standard, such as the Middle East, Saudi Arabia, SASO Certificate, Singapore, the structure identified, And Taiwan, China and many other types of Certification.

Especially we obtained the European CE Certificate in 2009 & UCMP Certificate in 2014 bring SAKURA won the highest international specifications, quality assurance, in 2011 by the Japanese government, Anti-smoke Doors certified for fire counter-measures, also due to the continuous research and innovation, Achieve numerous domestic and foreign patents.

It's not only an honour of our company, but the glory of Asia. Dream lift for home use – **Make you ride comfort & ease to use.**

All our product are international certified, our product have strictly pass the International CE certification, German TUV most efficiency elevator machine with Class A Grade, and pass Japan Safety Structure and Construction Certification, also pass the Singapore Government Special Structure Elevator Design and Safety. We keep improving and innovation to reinvention the Elevator Technology.

Elevator Innovator

The safety and comfort of our elevators is our primary concern. Pursuit of quality is a shared goal for all of our employees. In terms of hardware, we insist on the use of AMADA equipment from Japan, supplemented with computer-based production and a stringent quality system. Our philosophy is being serious, professional, committed, and insistent as we pursue the highest quality of manufacture in the World.

QUALITY CONTROL AND TESTING ON PRODUCT

QUALITY CONTROL AT PROJECT LOCATION

JAPAN FIREPROOF DOOR TEST

SINGAPORE FIREPROOF DOOR TEST

Sakura elevators has undergoes rigorous quality control and won numbers of international quality recognition, such as the European CE certification (elevator machine) which received since 2009. Sakura also received the UCMP certification from Japan government, Hong Kong Elevator system Certification and many other International certifications. With these broad certifications, Sakura has expand its operations into markets worldwide, ranging from Japan, North America, Europe, and China to newly emerging markets, including those elsewhere in Asia. By satisfying the needs of each market, Sakura will continue to provide and create value for its customers

QUALITY CONTROL & PRODUCTION MANAGEMENT MEETING

Inspection—ZERO DEFECT TARGET

We conduct various inspections and record at each process based on rigorous criteria such as material/semi-finished product acceptance inspections, process inspections, and product inspections before shipments. In addition, we send the reports to our clients and verify the products with them.

Quality Improvement

Regarding defects caused in productions and any quality issues, we will implement prevention methods and provide reports to analyze the problems. We can't endure the same mistake happening again.
